

## **MWT10-33**

### • RS-232 to 3.3V TTL Converter(DB9)

#### Features

- Port Powered: no external power is necessary
- Data Direction, auto-turnaround, no flow control is necessary
- Plug-and-Play (Device is hot-pluggable)
- Built-in surge protection, static protection and circuit protection

#### Introduction

The UPCOM MWT10-33 is a bi-directional port powered RS-232 to 3.3V TTL converter in a 9 pin format. It can convert any standard full duplex RS-232C port to a 3.3V TTL signal and vice versa. The unit is powered from the RS-232 data lines. It also supports data direction auto-turnaround. Therefore, no external power or flow control is required. The data direction auto-turnaround automatically enables the TTL driver when data is present on the RS-232 side making the device plug-and-play, requiring no software drivers. The MWT10-33 has a DB9 female connector on the RS-232 side and either a DB9 male connector or 5-way terminal block on the TTL side. Separate terminal block is included in package.

## Specification

Technology		
Standards	EIA RS-232C standard	
RS-232 signal	TX, RX, GND	
TTL signal	IN, OUT, GND	
Baud rate	300~115200bps	
Transfer distance	3.3V TTL side:3m,RS-232 side: no less than 5m	
Connectors	RS-232 Side: DB9 Female and, 3.3V TTL Side: DB9 Male or 5 bit Terminal Block	
Port protect	600W surge protection, 15KV ESD protection	
Power		
Power	Port powered from RS-232 data lines	
Current consumption	Less than 10mA
