Introduction

While working with the IEEE 802.3af power source equipment (PSE), and auto-detect the IEEE802.3at PoE equipment, protects devices from being damaged by incorrect installation. This single port PoE splitter supports the deployment from restrictions of power outlet locations, which eliminates the costs for additional AC wiring and reduces the installation time. Data and power transmission distance can be up to 100 meters.

For the cost saving and power management purpose, the PS101G-at is the ideal IEEE 802.3at Power over Ethernet device that splits the 48V DC into 5V/12V DC power output through the RJ-45 Ethernet cable. It is complies with IEEE 802.3at Power over Ethernet, IEEE 802.3/802.3u 10/100Base-TX Ethernet standard.
